

UD1007 (HDMI To UVC/UAC+USB3.0)

Product Introduction

Devicewell UD series product UD1007, is a UVC output device to facilitate terminal image collection.

UD1007 is a live broadcast auxiliary device developed for the general live broadcast market. Through HDMI interface, you can connect PC, DVD, TV box, camera and other audio and video signals, which is convenient for users to flexibly access their own live broadcast platform. The device supports UVC+UAC function, connects to the PC terminal device through the output signal, and docks with the OBS software, which can realize the audio and video of the live screen to be transmitted to the audience with high-definition 1080P streaming media content;

In addition, the equipment is equipped with 1/4 hot shoe screws, which is convenient for professional users to fix the equipment.

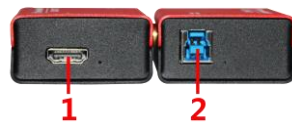

Product Parameters

Name	UVC output terminal image capture equipment	
Model	UD1007	
HDMI Signal Input	Signal	HDMI signal
	Bit rate	270Mbps~2.97Gbps
	Signal amplitude	800mV±10%(75Ω)
	Impedance	75Ω
USB3.0 Signal Output	Output signal	Standard USB3.0 signal
	Impedance	100Ω
Common Parameters	Signal amplitude	800mV±10%
	Connector	HDMI
Common Parameters	Power supply	USB 5V
	Power	<3W
	Size	50*45*25mm
	Weight	0.1 KG
	Working temperature	0°C~50°C no condensation
	Storage temperature	-20°C~75°C
	Work humidity	20%~70%RH
Storage humidity	0%~90%RH, no condensation	

Product Features

- ◆ SDI + HDMI to UVC/UAC
- ◆ Support UVC protocol output
- ◆ Support interlaced to progressive
- ◆ Support Windows, Android and other OS
